

**Barbiturates / Toxicol. Analysis for Brain Death Diagnostics – Serum 2020-10 1.8**

For quality monitoring of quantitative measurements

Medidrug® **Thiopental S**

GC, HPLC

Lyophilized serum-based reference material for accuracy monitoring of thiopental determination. The indicated target values are verified by independent accredited laboratories.

These reference materials are produced exclusively on the basis of human matrices. The highly accurate manufacturing occurs in a very gentle way. Analytical matrix effects are almost excluded. We achieve this by granting a maximal conformity of the products matrix with the matrix of the patients' sample.

Medidrug® **TABD S**

**- New -**

Lyophilized serum-based reference material for accuracy monitoring of toxicological analysis for brain death diagnostics. The indicated target values are verified by independent accredited laboratories.

**Benzodiazepines – Serum / Urine**

2020-07

1.9

**For quality monitoring of quantitative measurements**

These reference materials are produced exclusively on the basis of human matrices. The highly accurate manufacturing occurs in a very gentle way. Analytical matrix effects are almost excluded. We achieve this by granting a maximal conformity of the products' matrix with the matrix of the patients' sample.

Medidrug® **Benzodiazepines S / U**

Lyophilized controls for accuracy monitoring of benzodiazepines determination in serum or urine. The indicated target values have been verified by independent accredited laboratories.

Medidrug® **Basis-line S / U**

Lyophilized serum / urine based reference material for base line determination in different applications or as negative control. (All components at 1.13 Blank Matrices.)

**Blank Matrices – Hair / Serum / Urine / Whole Blood** **2021-08** **1.13**

**For quality monitoring of quantitative measurements**

These reference materials are produced on the basis of human matrices. The highly accurate manufacturing occurs in a very gentle way. Analytical matrix effects are almost excluded. We achieve this by granting a maximal conformity of the products' matrix with the matrix of the patients' sample.

Medidrug® **Basis-line H**

Authentic hair reference material, prepared from multiple European hair donors and homogenized by cutting into pieces of 1 mm. For negative control of analytical procedures in hair as well as for base-line determination in different applications in analytical laboratories.

Medidrug® **Basis-line S / U / VB**

Lyophilized serum-, urine- or whole blood-based reference material. As negative control or base-line determination in different applications.

GC-MS, HPLC, LC-MS
